Art Unit: 3641

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to method of using(sending and receiving) electronic book system, classified in class 709, subclass 203.
- II. Claims 6 & 9, drawn to method of using(purchasing) electronic information, classified in class 705, subclass 26.
- III. Claims 7 & 8, drawn to electronic book system, classified in class 709, subclass 203.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions III and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, group I can be used with a personal computer. Group III having a plurality of subervers, needs more than a PC.

3. Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as purchasing of electronic information as oppose to invention II that relates to sending and receiving. See MPEP § 806.05(d).

1. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, their

Art Unit: 3641

recognized divergent subject matter, and search required for Group I, is not required for Groups II & III, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Carl Brundidge on 6/30/03 and 7/9/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ms. Buckley whose telephone number is 703-305-0041. The examiner can normally be reached on Tues-Thurs 10-3 pm.
